ALKEEMIA BATTERY FORUM

2024

CHEMISTRY BEHIND THE CELL

Alkeemia Battery Forum is an open event organized by Alkeemia and reserved for companies and professionals working within the battery and storage ecosystem, with the aim of supporting the European market growth by creating effective connections along the value chain and sharing updates on relevant projects underway.

Speakers will provide a top-level technical perspective to draw what the local short-term needs are for a successful supply chain and what can be done to support the long-term innovation.
